Sole Source Criteria and Required Documentation Report from PICC Excellence, Inc.

Unique Functionality of our Training:

PICC Excellence, Inc. education includes best practices and research that is current and to the point and does not waste the nurses time which is very precious to everyone these days. Even more than that all of our courses include testing of knowledge and competency forms. The competency forms are in the resource section that also includes the course manual and other pertinent charts, articles and information. Facilities that use the competency forms for evaluation of performance can add the observational results to the employee file demonstrating a high level of quality and commitment to patient safety.

Benefits of using our training for UMMC:

With your team trained with up to date continuing education, your Hospital has the opportunity to reduce **infection rates**, align **best practices** to establish competency and consistency with procedures, reducing accidents (from lack of knowledge) and be KNOWN as the Hospital where Patient Safety, Education and Nursing Best Practice are first and foremost. We not only provide education for Adults, but also include Pediatrics and Neonates, with multiple classes in each area. We currently offer over 70 online courses, with new courses being added each year. The Site License allows hospital administrators to provide quality vascular access education to their entire nursing staff at a discounted rate. Site licensing allows **open access to all PICC Excellence, Inc. courses** for an entire year from the date of purchase with renewal options available annually.

Other sources for PICC Excellence training:

Currently we are unaware of any other PICC training companies that provides the extensive course catalogue that we offer. We do not have any resellers using our training that could provide a competitive quote for the site license, that is highly discounted and offers the best value for facilities training multiple nursing staff.

Sincerely,
